

Synodon Signs Customer Contract with Keyera Energy

For Immediate Release

Edmonton, Alberta – June 10, 2010 - Synodon Inc. ("Synodon") [TSXV-SYD], announces that it has signed a contract to provide remote airborne ethane leak detection services to Keyera Energy. This is the first contract with Keyera Energy which operates gathering pipelines as well as a number of gas processing facilities. This initial contract will survey the portion of their system which transports ethane, while a survey for the larger natural gas system is currently under consideration. The flights are scheduled to be completed in the next 60 days.

Synodon Inc. (www.synodon.com) is an Edmonton based technology company which has developed and demonstrated an advanced airborne remote gas sensing system called *realSens*[™], based on technologies developed under the Canadian Space Program and by Synodon scientists. The company will provide gas emissions monitoring and quantification services to a variety of industries, including hydrocarbon (oil and gas), environmental, agricultural and for a variety of gases including methane, ethane and ammonia. The initial focus is on the hydrocarbon industry and in particular the natural gas pipeline sector.

Keyera Energy (www.keyera.com) provides a range of gathering, processing, fractionation, storage, transportation and marketing services to the oil and gas industry. As a "midstream" business, Keyera is not engaged in exploration and production; rather focuses on providing essential services to producers and delivering natural gas liquids and other related products to key markets across North America.
