

Synodon Signs Second Contract with ATCO Pipelines

For Immediate Release

Edmonton, Alberta – October 21, 2010 - Synodon Inc. ("Synodon") [TSXV-SYD], announces that it has signed a second introductory survey contract to provide remote airborne methane leak detection services to ATCO Pipelines on a portion of their network. ATCO Pipelines operates more than 8,500 kilometers of natural gas transmission pipelines throughout Alberta.

The flights are scheduled to be completed over the fall of 2010.

Synodon Inc. (www.synodon.com) is an Edmonton based technology company which has developed an advanced airborne remote gas sensing system called *realSens*[™], based on technologies developed under the Canadian Space Program and by Synodon scientists. The company provides gas emissions monitoring and quantification services to a variety of industries, including hydrocarbon (oil and gas), environmental, agricultural and for a variety of gases including methane, ethane and ammonia. The initial focus is on the hydrocarbon industry and in particular the natural gas pipeline sector.
