

Synodon Signs Major Gas Producer to realSens™ Services Contract

For Immediate Release

Edmonton, Alberta – October 31, 2011 - Synodon Inc. ("Synodon") [TSXV-SYD], announces that it has signed a significant contract to provide remote airborne methane leak detection services to one of North America's largest gas producers.

"We are very pleased to be working with a leading North American natural gas producer to provide leak detection information for the majority of their British Columbia pipeline assets", stated Adrian Banica, Chief Executive Officer of Synodon. "The length of this survey is representative of the length of service kilometers we expect to contract in the future and is significantly higher than the initial contracts Synodon has signed to date".

The contract covers the entire pipeline infrastructure operated by the producer in British Columbia which is roughly 10% of their total network in Canada and the United States.

The flights are scheduled to be completed in the next 30 days.

Synodon Inc. (www.synodon.com) is a technology company which has developed an advanced airborne remote gas sensing system called *realSens*™, based on technologies developed under the Canadian Space Program and by Synodon scientists. The company provides a full service gas emissions monitoring and quantification service to a variety of industries, including hydrocarbon (oil and gas), environmental, agricultural and for a variety of gases including methane, ethane and ammonia. The initial focus is on the hydrocarbon industry and in particular the natural gas pipeline sector.
